

7th INTERNATIONAL GEOLOGICA BELGICA MEETING 2021

Geosciences Made in Belgium

15-17 September 2021 – AfricaMuseum Tervuren (Belgium)

The Royal Museum for Central Africa is pleased to welcome the 7th international Geologica Belgica Meeting 2021 in the recently renovated AfricaMuseum. Modern conference rooms and facilities within the Welcome Pavilion are ideally fitted to host the conference. The museum building itself is made of a variety of materials issued from Belgian quarries. The theme of the conference “Geosciences made in Belgium” opens a forum where Belgian scientists and colleagues will exhibit the wide diversity of their activities, in Belgium and abroad. The RMCA promotes research activities in Africa and the organizers therefore welcome contributions by African scientists and/or focusing on African research questions. The organizers warmly invite you to submit contributions, attend the meeting, and take part in stimulating debates.

A total of 13 sessions have been identified, covering various disciplines of Earth and Planetary Sciences:

- Geodynamics and Mineral Resources
- Earth Surface Processes and Geohazards
- Planetary Magmatic and Metamorphic Systems
- Geology, Man and Society
- Basin Research and Sedimentology - Stratigraphy
- Past, Present and Future of Life on Earth
- Karsts Investigation and Subsurface Researches
- New Methods in Geosciences
- Polar Sciences and Ice-sheets
- Permafrost
- Quaternary and Anthropocene (BELQUA)
- Geophysics and Seismology
- Geo-energy

Should the COVID-19 pandemic not allowing meeting in person, the conference will be postponed to September 2022.

Organizing Committee: D. Delvaux, O. Dewitte, M. Fernandez-Alonso (RMCA), A. Hubert-Ferrari (ULiège), J. Elsen (KU Leuven)
